What's Included

- 1 x ArGo Portable Micro-Heater
- 1 x ArGo Battery
- 1 x ArGo USB Charger / Power Adapter
- 2 x ArGo Glass Aroma Tubes
- 2 x ArGo PVC Travel Tubes w/ Cap
- 1 x ArGo Belt-Clip Carry Case
- 2 x ArGo Silicone Stem Caps
- 1 x Stainless Steel Stirring Tool
- 4 x ArGo Stainless Steel Filter Screens
- 1 x ArGo Owner's Manual

Control Panel

The Control Panel consists of the OLED and three buttons: Menu (M), Plus (+) & Minus (-). Use the Menu button to navigate the settings. Use the Plus & Minus buttons to adjust each setting.

Temperature Settings - The ArGo has a wide temperature range of 50° C - 220° C (122° F - 428° F). The temperature is adjustable in 1° and 10° increments.

Audio / Beep - This function has three volume settings and can also be turned off. If the Audio / Beep is activated a beep will be heard when the ArGo is powered on or off.

Temperature Alert - This function has three volume settings and can also be turned off. If the Temperature Alert is activated two beeps will be heard when the set temperature is reached.

Power-On Delay - The power-on delay safety feature ensures you don't accidentally turn on the unit and has four settings for your convenience: 2 Seconds, 4 Seconds, 6 Seconds, and 8 Seconds. The default setting is 6 seconds.

Automatic Shut-Off Timer - The automatic shut-off timer safety feature ensures you don't forget to turn off the unit and helps conserve battery life. The shut-off timer can be adjusted between 5 – 15 minutes in one-minute increments. The default setting is 10-minutes.

Celsius or Fahrenheit - The ArGo display can be set to Celsius or Fahrenheit. The default setting is Celsius.

Display Brightness - The unit's display has three brightness settings: low, medium, and high. The default setting is medium.

Operation

(1) Load Glass Aroma Tube.

Put some coarsely ground botanicals in a small container then gently push and slightly twist the glass stem into the container to fill the dish. Do not press too hard or pack too tightly. Loading the Glass Aroma Tube this way takes advantage of its design ensuring easy maintenance and optimal performance.

(2) Insert the Glass Aroma Tube.

Pre-heat unit before inserting any tight tubes. You can carry a pre-loaded Glass Aroma Tube inside your ArGo and extra pre-loaded Glass Aroma Tubes in your ArGo Carry Case for quick and easy vaping on the go!

(3) Close the Push-Top.

Push down the top to expose the end of the Glass Aroma Tube for use. For protection of the Glass Aroma Tube press the release button on the back of the unit.

(4) Press and hold the (+) & (M) buttons to turn on the unit.

A timer will count down on the OLED screen showing the power-on delay and a greeting message is displayed when the unit is powered on.

(5) Set the temperature and let the unit heat up.

Press one of the three control panel buttons and the ArGo will start to heat up to the previously used temperature. Press the (+) and (-) buttons to adjust the temperature in 1-degree increments, or hold the button down to adjust the temperature in 10-degree increments.

(6) Inhale vapors.

Inhale vapors through the Glass Aroma Tube in a slow steady draw. Varying factors will determine the temperature setting to use, such as the type of botanicals, moisture content, whole flower or ground form, etc. Try using different inhaling techniques with different temperatures to suit your personal needs / preferences.

Battery Performance

Arizer Batteries meet rigorous quality standards. With normal use they will last for hundreds of charge cycles before losing any capacity. Dropping the unit can result in battery damage that may limit / reduce the battery capacity quickly, so it is important to handle your unit carefully.

Battery Charge

Depending on the temperature setting and general usage patterns the ArGo battery will typically last for 3 hours of use per charge. The battery will take 3 hours to fully charge, or longer if you use it while charging.

Use While Charging

If your battery is running low, with the Solo II, you don't have to wait for the battery to fully charge before you can use it. Just partially charge the battery (5-10 minutes) and then you can set the temperature and use the Solo II while the battery continues charging.

Note: The ArGo will not operate if the battery is completely drained.

The ArGo and ArGo Chargers have built-in protections to prevent the battery from being overcharged or drained too low. To conserve battery life, use the ArGo in a temperature-controlled environment and use lower temperature settings. When outdoors, stay sheltered from the elements and avoid using in extremely cold temperatures.

Battery Replacement

The ArGo Battery is a high-capacity, long life battery, and will last for a long time, even with prolonged / regular use. The ArGo Battery is covered under a Limited 1-Year warranty and replacements are available for purchase upon request. To inquire about replacing your ArGo Battery send us an email to: service@arizer.com

Safety Disclaimer

Arizer Batteries should not be substituted for third-party batteries - Only use official ArGo Batteries with your Arizer ArGo. We cannot verify the quality or safety of other batteries, and using third-party batteries can result in personal injury, electric shock, and damage to the device which is not covered under warranty.

Cleaning & Maintenance

The ArGo itself is essentially maintenance free so you can spend your time using it instead of cleaning it! Simply recharge the battery when it is low, swap out pre-loaded Glass Aroma Tubes on the go without worry about emptying or cleaning bowls, and keep your herbs / botanicals contained in the removable Glass Aroma Tubes that can be cleaned effortlessly!

After numerous uses the glass parts should be cleaned to ensure optimal performance. To clean the glass parts, soak them in isopropyl (rubbing) alcohol for a couple hours then rinse with hot water. In most cases doing this will clean the Glass Aroma Tubes as good as new, but if not simply repeat as necessary. After cleaning, always ensure the Glass Aroma Tubes are fully dry before use.

Cautions, Disclaimers & Warnings (Read before use)

First Time Use – Examine box contents to ensure all included parts are in good condition, not damaged from shipping. Check glass parts for cracks or breakage. Packaging materials, bags, & small parts may pose a choking hazard. Keep out of reach/use from children, minors and pets. Glass Aroma Tubes may fit tightly in the unit at first. If you are finding it difficult to insert a Glass Aroma Tube, turn on the Solo II, set the temperature to 200° C, and let the unit heat for 1–2 minutes then try again.

Warning – Hot Parts – Handle hot parts and glass parts with care. Do not place hot parts on non-heat safe surfaces. Carefully attach protective heat-rated silicone caps to safely cover hot end of glass parts. Allow heating unit and hot parts to cool before placing in purse, pocket, or any container where damage from hot parts can occur.

Parts are made from strong scientific quality borosilicate glass, but all borosilicate glass is breakable so handle with care and caution. Avoid tapping on hard surfaces to prevent cracking and breaking. If glass is dropped or sustains an impact, examine for cracking, chipping and weakness before use. Do not expose hot glass parts to cold water or extreme temperature change as this may result in cracking/breaking.

Product contains electrical and delicate parts -- do not drop. If damaged do not operate. To protect/prevent against electric shock/fire never immerse or operate the product in or around any water/liquids. Do not stick or pour anything in the unit or place near flammable material. Do not store/operate/expose the unit and contents to extreme temperatures. Do not open the unit – doing so may cause electric shock and voids warranty.

Do not leave the unit turned on and left unattended.

The information contained in this manual is an aid in understanding the various theories and practices, preparation and uses, and does not represent an endorsement or guarantee the efficacy or use of its preparation. This information is not intended in any way to replace or supersede professional consultations.

The information contained herein is for instructional and cautionary purposes only. In no way is the information contained herein intended to be a medical or prescriptive guide or to be used for diagnosing or treating a health problem, condition or disease. It is the users responsibility to consult a Physician or Medical Professional. This product is not licensed as a medical device, use unit only for its intended use.

Limitation of Liability (Read before use)

Failure to read or follow instructions, improper or careless use may lead to personal injury. Arizer and affiliated companies will not assume any liability for injury or damage resulting from the use or misuse of this device. Due to the fragility and nature of glass Arizer and affiliated companies are not responsible for cuts or injuries sustained from breakage. Arizer and affiliated companies are not liable for injuries or burns associated from touching hot parts. Arizer and affiliated companies are not liable for failures to comply with these warnings and safety guidelines. By purchasing this product the buyer assumes all risks associated with lithium batteries. If you do not agree with these conditions return the product immediately before use. This product is intended for use with the botanicals described herein -- Arizer and affiliated companies are not liable for use with other than those botanicals described herein. Company's

liabilities for damages in connection with the product and its parts shall not exceed the purchase price of the product.

IMPORTANT - Obey local laws. Not all essential oils, botanicals and herbs are legal for use in every Country or State. Check your Local, State, Federal and Importation laws before ordering botanicals. This device is meant for legal use only.
