

XVAPE AVANT VAPORIZER OPERATION GUIDE

1.LOAD

Open the magnetic cap to expose the heating chamber, pack in herbal material and close the cap. Note that the tighter the chamber is packed the more draw resistance will be experienced. If over-packed the XVAPE AVANT won't have good airflow.

Do not over load the device chamber with desired materials, for devices with variable temperature settings, please find the best setting that is comfortable and safe for your enjoyment.

2.TURN ON AND ADJUST

To turn the vaporizer on, click the power button 3 times. When the unit is on, the LED light will indicating the battery level.

o toggle between heat settings, press and hold the power button. The LED lights will light up as temperature changes.

XVAPE AVANT-The LED lights will light up as temperature changes

3.OPERATE

Once you have set device at your desire settings, waiting till the light become solid and then inhale and the device automatically begins vaping. To operate the vaporizer, simply draw steadily and deeply through the mouthpiece. The unit will auto shut off in 3.5 minutes from when turned on. If you are done vaporizing earlier than the auto shut off, simply click the power button 3 times to turn off.

LIGHT VAPOR

180°C
(356°F)

DENSE VAPOR
